

A5 ML OPS submission

Fail Screen

The screenshot shows the GitHub Actions interface for a workflow named 'ML_A5'. The workflow is in a 'Failure' state, triggered by a push to the 'main' branch. The summary shows a failure in the 'deploy' step, which took 6s, while the 'validate' step took 4s. The workflow file 'pipeline.yml' is shown, and the annotations indicate 1 error and 2 warnings.

ML Pipeline
fix error #1

Summary

All jobs

validate
deploy

Run details

Usage

Workflow file

Triggered via push 23 minutes ago

Status: Failure

Total duration: 18s

Artifacts: 1

pipeline.yml
on: push

validate (4s) → deploy (6s)

Annotations
1 error and 2 warnings

The screenshot shows a code editor with the 'train.py' file open. The code simulates training, calculates accuracy, and saves it to a file. The accuracy is 0.7.

```
1 # simulate training
2 accuracy = 0.7
3
4 print(f"Model accuracy: {accuracy}")
5
6 # save accuracy to file
7 with open("accuracy.txt", "w") as f:
8     f.write(str(accuracy))
9
10 # simulate run ID
11 with open("run.id.txt", "w") as f:
12     f.write("12345")
13
```
