

A4 ML Report

Bugs and fix

Bug 1 — Workflow triggers not correct

on:

push:

pull_request:

Problem:

- `push:` had nothing inside → it would trigger on all branches including `main`.

Fix:

on:

push:

branches-ignore:

- main

pull_request:

- Now it **ignores pushes to main**

Bug 2 — Python not set up correctly

- name: Set up Python

uses: actions/setup-python

with:

python-version: '3.10'

Problem:

- If you don't specify the **version tag** of the action (@v5), GitHub may use an older or unstable version.

Fix:

- name: Set up Python

uses: actions/setup-python@v5

with:

python-version: '3.10'

- Pinning to @v5 ensures a **stable version**.

Bug 3 — Flake8 not installed

- name: Linter Check

run: flake8 .

Fix:

- name: Linter Check

run: pip install flake8 && flake8 .

- First installs flake8, then runs the linter.

Bug 4 — Dry test fails if torch not installed

```
python -c "import torch; print('Model environment ready!')"
```

Fix:

- Ensure **torch** is listed in **requirements.txt** and installed in the **Install Dependencies** step before this dry test.

Bug 5 — Upload artifact fails if path is wrong

- name: Upload README Artifact

uses: actions/upload-artifact@v4

with:

name: project-doc

path: README.md

Fix:

- Make sure **README.md** exists at the root of repo, or adjust **path:** to the correct location.

Bug 6

steps:

- name: Checkout Repository

uses: actions

Problem we must add checkout to be able to take the correct code

Fix

steps:

- name: Checkout Repository

uses: actions/checkout@v4

Repository link

<https://github.com/Habiba160/mlops-assignment/actions/workflows/ml-pipeline.yml>

The screenshot shows the GitHub Actions interface for a workflow named `ml-pipeline.yml`. The left sidebar contains navigation links: **Summary**, **All jobs** (with a dropdown arrow), **validate-and-test** (marked with a green checkmark), **Run details**, **Usage**, and **Workflow file**. The main content area displays the workflow details for the `validate-and-test` job, which completed successfully 1m 47s ago. Below the job status, there is an **Annotations** section showing a warning about deprecated Node.js 20 actions. At the bottom, the **Artifacts** section lists a single artifact named `project-doc` with a size of 188 Bytes and a SHA256 digest.
